PRODUCT DESCRIPTION

The SEGO 80 is the newest addition to the SEGO lightbox family. This version was designed for use as a single unit in store display, so it does not have the modular capabilities of its larger counterparts but still allows for double sided graphic display. The design of the SEGO 80 has been streamlined and now features an integrated transformer built into the frame so only a single power cable is exposed outside of the lightbox. Included as always with SEGO displays is a padded travel bag with foam inserts to keep your display secure and in place during storage and travel.
