

Product Features

The VAIL-120D is a double-sided extrusion with a profile width of 120 mm (4.7 in.). This extrusion has a solid outside finish and is rigid due to its taller and reinforced spine. The thickest profile width we have to offer, VAIL-120D is especially good for free-standing large images (tall or wide) because it is more stable than the thinner profile widths; however, it can be wall mounted or hung overhead as well. When installing the fabric graphic, the silicone beading can fit slightly more than 12 mm (.47 in.) deep and 3 mm (.11 in.) wide into the silicone beading trough. This extrusion is compatible with edge-lights or ladder lights (can be backlit.)

Specs

Specifications:

- 120 mm (4.7 in) wide aluminum profile
- Double-sided graphic display
- Accepts 12 mm keder

Functions:

- Free standing display
- Wall mount display
- Suspended display
- LED Light Box
