

# Hybrid Pro 20x20 Modular Island Kit 29

## HP-K-29

Hybrid Pro™ Modular Kit 29 is a modular 20ft x 20ft island exhibit kit that offers a plethora of features and a modern appearance. The center floor-based display is nearly 8ft tall and 8ft wide and includes three shelves on each side. A lockable door on the side of the center structure allows for accessible and secure storage. Triangular shaped fabric side walls offer a modern, angular look. Fabric graphics on the center structure are a combination of pillowcase fabric graphics (on the triangular side walls) and push-fit fabric graphics on the center walls. Two kiosks are included, which are similar in construction to the center display. Both kiosks offer four sides for graphic messaging, as well as three shelves for small product display. Counters shown are not included. Last but not least, a lightweight pill-shaped fabric structure caps the display for ample branding above eye level. No rigging required!

## features and benefits:

- 12'4" tall island display
- No rigging required
- Center display includes four walls, two pillowcase fabric graphics and two push-fit fabric graphics, six shelves and a lockable door for storage
- Each kiosk includes four walls, two pillowcase fabric graphics and one push-fit fabric graphics, and three shelves for product display
- Pill shaped top fabric structure is tubular with pillowcase fabric graphics
- Each shelf can hold 15lbs
- Ships freight

# TOP DOWN LAYOUT

# FABRIC, VINYL & UV GRAPHIC CARE GUIDELINES

## GENERAL HANDLING FABRIC GRAPHICS

- Your fabric graphics should always be handled in a clean, dry area with clean hands. When possible, use white fabric gloves.
- Be sure fabric is clean and dry before packing.
- Machine washing and/or drying is not recommended for all fabrics. Refer to chart below for which fabrics are washable.

## EMERGENCY STAIN TREATMENT (FABRIC)

- For dry stains, like loose dirt or pencil marks, try initially using masking tape or Magic Eraser (dry-not moistened).
  - Masking tape or MagicEraser (dry) can be quite effective at lifting dry, surface dirt. Try 'pulling' as much of stain away as you can. Avoid rubbing stain into fabric.
- Introduce water or liquid cleaner for stains not responsive to masking tape or dry Magic Eraser.
  - When using liquids to treat stains, if at all possible, treat the stain with fabric off of the frame.
  - Place a clean dry cloth behind stain (to absorb stain while being treated). Moisten another cloth initially with just water (distilled water is optimal, if available).
  - Gently blot stain with moistened cloth (or small area of moistened Magic Eraser), while trying to push stain through to the back, using the dry cloth to absorb.
  - Repeat using care to keep the wet area as small as possible.
- Grandma's Secret Spot Remover can be an effective stain remover. Mix several drops in a small cup with clean water. Repeat above technique, taking care to keep wet area as small as possible and using dry cloth on back of stain to absorb.

## MACHINE WASHING FABRIC GRAPHICS

- Cold water/delicate cycle/tumble dry low or air dry. For stretch fabrics do not use dryer, let hang dry.
- Use caution on dryer time with graphics containing liners. Its best to put tension fabric on frame when fabric is still damp and let it air dry. Always be sure that the aluminum frame is clean when mounting the damp graphic.
- Fabric stretch graphics that are washed and machine dried may shrink up to 3/4" per every 50" of fabric in the direction of the stretch and shrink up to 1/4" in the non stretch direction.

## STORING & PACKING BACKLIT GRAPHICS

- To avoid cracks in the ink or having to steam graphics, Backlit fabrics should be loosely folded with bubble wrap or stored around a tube.
- Avoid folding the graphic tightly to store in a small bag or box.

## GENERAL HANDLING VINYL & UV GRAPHICS

- Vinyl banners and rigid graphics should always be handled in a clean, dry area with clean hands. When possible, use white fabric gloves.
- Be sure vinyl/ UV is clean and dry before packing. Always follow material handling and packing instructions included.
- All vinyl materials should be rolled with graphics facing in to protect the graphic printed side. Roll on a tube if available.
- Avoid folding materials to reduce the risk of crease lines and chipped inks. If a graphic must be folded, try to fold loosely and as few times as possible.

## EMERGENCY STAIN TREATMENT (UV)

- For drier stains, like loose dirt, pencil marks or adhesive, try initially using masking tape. Masking tape can be quite effective at lifting dry, surface dirt. Try 'pulling' as much of stain away as you can and avoid rubbing the stain into the material.
- When using Solvent to clean a stain be sure to avoid any image. Solvent is aggressive and will take the image off. Soapy water should be used at a ratio of 1 part Dawn® /10 parts water.
- While using Windex® avoid scrubbing harshly. Too much pressure can fade the graphic print.

## GENERAL HANDLING OF ROLLABLE PVC PANELS

All mural panels, truss panels and detachables should be rolled with graphics facing out to protect the graphic printed side. Mural panels should be stored in the original plastic sleeves that are provided with the panels.

# FABRIC, VINYL & UV GRAPHIC CARE GUIDELINES

## STEAMING FABRIC GRAPHICS

- For optimal results, steam wrinkles when fabric is tensioned and installed securely on the frame.
- Fill steamer with clean drinking water or distilled water. Avoid using water containing hard minerals.
- Hold steamer upright and hold close to fabric. Avoid touching fabric with steamer.
- Do not tip steamer as water drips may cause water marks to form on graphic.

# Setup notes

**1. Redesign of this exhibit without approval by manufacture may result in dangerous and unsafe structures. Manufacture disclaims any responsibility for redesigned exhibits it does not approve in writing.**

**2. Parts and components such as panels and extrusions are manufactured to metric sizing. Where ever possible sizes have been noted in feet and inches as well as in metric. Below is the imperial to metric sizing table as a reference. 'Nominal' refers to approximate sizes.**

## IMPERIAL TO METRIC SIZES

**8' Nominal = 94 1/2" or 2400mm Actual  
4' Nominal = 47 1/4" or 1200mm Actual  
3' Nominal = 35 7/16" or 900mm Actual  
2' Nominal = 23 5/8" or 600mm Actual  
1' Nominal = 11 13/16" or 300mm Actual**

# Modulate Frame 13

## MOD-FRM-13

Modulate™ Fabric Banners feature unique angles and shapes, are portable and easy to assemble. Choose from multiple frame shapes and connect them to design your own combinations. The aluminum tube frames feature snap-button and spigot connections and are coupled with a printed pillowcase fabric graphic that slips over the frame and zips at the bottom. Two linking clips are included to connect banner frames together and universal feet connect the tube frames at the bottom of the display. Each frame comes in a durable, portable carry bag.

## features and benefits:

- Premium aluminum tube frame with spigot and snap button assembly
- Easy to store and ship
- Quick to set up
- Weighted feet for added stability
- Comes with carry bag and box
- Zipper pillowcase fabric graphics
- Lifetime limited hardware warranty against manufacturer defects

# Connection Methods

Connection Method 1: TC-30-T

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

Connection Method 2: TC-30-90T

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

Connection Method 3: TC-30-X

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

Connection Method 4: TC-30-T-CS

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

# Connection Methods

## Connection Method 5: ES30-90B

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not over tighten.

## Connection Method 6: PLT-BP-LN114-S5

First, loosen the set screw that is on the ES30-90B, then attach the base plate with the M10 insert. Once the base plate is in the desired position, fasten the set screw to hold the insert in place.

## Connection Method 7: PLT-BP-LN114-S5

To attach two frames side by side loosen the set screw that is on the ES30-90B. Do not remove the set screw. Next, rotate the stabilizing base hole to the outside of the frame and tighten the set screw. Next, use the provided ES30-90B M10 bolt to fasten the frame onto the base. Don't forget to use your frame clip at the top to level the panels.

## Connection Method 8: MOD-CLP

Be sure to fully assemble all frames with fabric pillowcase before using clips. Simply snap the frames into the clips and adjust until frames are aligned as desired.

# Kit Assembly

## Step by Step

### Step 1.

Gather the components to build the frame. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 1, 2 and 5 for more details.

### Step 2.

Locate your pillowcase graphic. With the pillowcase unzipped, encase the frame by covering the frame from top to bottom. Zipper at the bottom.

### Step 3.

Locate the stabilizing bases. Attach each foot to the bottom ends of the frame. Use the allen key tool provided to lock the bases in place.

Reference Connection Method(s) 6 for more details.

### Step 4.

Setup is complete.

If you are connecting frames side by side, reference Connection Method(s) 7 and 8 for more details.

PM4S3-MK-SHELF-UNIT

The Freestanding Monitor Kiosk is a superior multimedia display that can be used for multiple applications, as well as in trade show exhibits and for events. Kiosks include monitor mounts to support a medium or large size TV, and a corresponding medium or large shelf may be added. Monitor mounts support TV's up to 40 lbs and 32" - 65" in size, and can be adjusted to the perfect height; an included shelf can hold up to 15 lbs. The Shelf Unit is a great addition that proudly displays small products. Install the Freestanding line behind a fabric backwall for a truly impressive display.

# Exploded View

## PM4S3-MK-SHELF-UNIT

# Kit Assembly

## Step by Step

### Step 1.

Reference the image to the right. Locate the coded extrusions. Slide the PH2-300-TG connector into one end of the PM4S3-1200-A165-A165 so that it goes as deep as the internal pins. Connect the PM4S3-600-A165-A165 by sliding it over the PH2-300-TG. Repeat for this step for the second vertical.

### Step 2.

Collect your extrusions and handtool. Using the provided handtool, lock the extrusions into the back channel of the three channel PM4S3 faces as shown in the image below. Be sure the locks face toward the back of the assembly and do not over tighten.

### Step 3.

Locate the M5 thumbscrews, LN100s, and the PM4S3-MM stabilizing bases. Slide the LN100s into the middle channel of the PM4S3. Hand screw the M5 thumbscrews through the base holes and into the LN100 holes. Use the handtool to securely fasten the M5 Thumbscrews. Do not over tighten.

### STOP

Orbus recommends that you move your kiosk(s) in place before continuing on with the rest of assembly.

# OVAL SHAPED FABRIC STRUCTURE AND GRAPHICS

**PUT THE GRAPHIC ON BEFORE PUTTING THE FRAME INPLACE**

**HAVE THREE OR MORE PEOPLE HELP WITH LIFTING FRAME INPLACE**

# Hybrid Pro Counter 03

## HPC-03

All Hybrid Pro™ Modular counters feature accessible storage and locking doors. Purchased printed fabric graphics or rigid infill panels allow for your messaging and branding.

## features and benefits:

- White laminate cabinet
- UV graphic
- Locking storage door in back
- Laminated counter top in choice of color
- Easy step-by-step instructions
- Kit includes laminated cabinet, locking storage door, one vinyl graphic and one molded case
- Lifetime hardware warranty against manufacturer defects

## dimensions:

Hardware	Graphic
<p>Assembled unit: 39.375" w x 36.625" h x 15.75" d 1000mm(w) x 930.27mm(h) x 400mm(d)</p> <p>Counter holds max weight 50 lbs / 22.68 kgs</p>	<p>Total visual area: (UV Graphic - Rollable) Front Panel: 37.25" w x 35.18" h</p> <p>Door Graphic: 31.62" w x 31.75" h</p> <p>Please be sure to include a .5" bleed around the perimeter.</p> <p>If ordering Hybrid Pro Kit 10, please design on the door template. If ordering free-standing counter, please design on both the front and the door template.</p> <p>Refer to related graphic templates for more information</p> <p>Visit: <a href="http://www.exhibitors-handbook.com/graphic-templates">www.exhibitors-handbook.com/graphic-templates</a></p>
