Kit Assembly

Step by Step

Step 1.

Unpack the frame from the bag. Stand with backer side toward the floor. Stretch out the frame so it lays flat on the floor.

Hook and loop perimeter for attaching graphic comes preattached.
Step 2.

Lock the connecting arms into place. Stand the frame upright once all the connectors are securely snapped in the lock position.
Step 3.

Attach the stabilizing bases. Secure them in place while you stand the frame upright.

Step 4.

Gather all the lighting strips and align so they are over each "X" of the frame, then pull the spring-loaded clip apart to fit onto the "X". Make sure the orientation of the male and female connectors allows for linking them together.
Kit Assembly

Step by Step

Step 5.

Connect the long extension cord to the female end of the top light strips in series. Run the long extension cord down the side.
Step 6.

First, attach the extension cord from the top row of lights to bottom row of lights.

Step 7.

First, attach the extension cord from the top row of lights to first power supply. Then, attach the bottom row of lights to the second power supply.
Plug in the power cord for test lighting.

Step by Step

Step 9.

Once the lights are all set, it is important to disconnect the power to the lights before appling the graphic.

Lay the frame back down on the floor. Apply the graphic to the frame, the endcaps do not have to be immediately applied.

Step 10.

Stand the unit back to the upright position. Power On the lights and verify that they all work. Apply the end caps by wrapping them to the back side and fasten them closed.

Setup Complete.
