Installation Instructions

1. Put the installation drawing on the door, approx. 35mm between the door frame and center hole (Picture 1), then drill the hole

Picture 1

wire connection

	Door Thickness (mm)	Screw
	14mm~16mm	(M4*20) X 2
	16mm~18mm	(M4*22) X 2
	19mm~21mm	(M4*25) X 2

2. Connect one end of the panel connection line through the middle round hole with the lock box, first use two cross pan head screws M4*22 to fix the panel on the door panel, organize the connection line to avoid being pressed, then use two cross countersunk head wood screws 3.5*30 and one cross countersunk head wood screw 3.5*16 to fix the lock box on the door panel.

Picture 2

3. Fix the striking plate by screw ST3.5X12 (Make sure latch works well)
